

PROFESSIONAL SERVICES

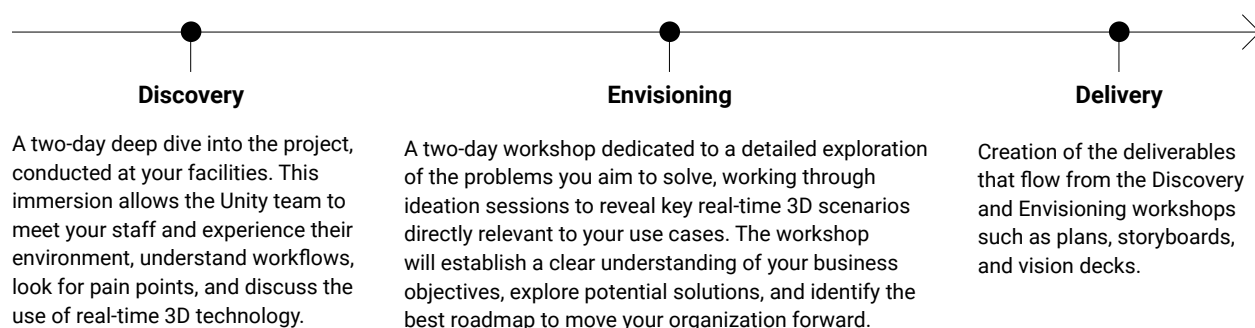

Envisioning

Develop your vision for real-time 3D with the help of Unity

Professional Services Envisioning is focused around getting a customer started for the first time in real-time 3D by shaping ideas and concepts into a full vision with a compelling project plan and business case.

What to expect

This two-week engagement consists of discovery and envisioning sessions with Unity experts to produce a detailed proposal that expresses your vision and the plan for moving forward, equipping you to secure resources and begin development.

At the end of the engagement, you will have:

A vision for how real-time 3D can transform your business

Graphic representations, such as storyboards and concept art, of the real-time 3D solutions identified to bring these ideas to life in a digital presentation

A detailed project plan that respects your timeline and budgets to inform the next phase of development

Why partner with Unity?

No one knows Unity like we do. Working with us gives you direct access to the engineers who built Unity and know the source code inside out – now and in the next version, so we can help you future-proof your work.

You'll be supported by leading industry veterans with insight into market trends, emerging and adjacent technologies, and best practices. We are partners who stay laser-focused on making sure you succeed throughout your journey with Unity.
