CONSULTING

Technical Architecture Consulting (TAC)

Expert technical architecture guidance from Unity engineers

Build a solid, scalable foundation for your project from the start. Unity's Technical Architecture Consulting package will ensure you make the correct decisions.

Our team of expert engineers will help you identify requirements, plan technical architecture, and recommend best practices to ensure your project is set up for success. Our expert guidance will help you tackle difficult architecture challenges so you can avoid expensive refactoring and additional iteration cycles later in production.

What to expect:

— A Unity engineer spends three days onsite diving deep into your project's requirements, roadmap, technical environment, and schedule.
— We produce a custom report with actionable architectural guidance that will identify key technical challenges and tell you how to tackle them.

Benefits

Get a technical architecture grounded in best practices and designed for your project goals

Improve development and increase iteration speed

Mitigate project risks and avoid potential roadblocks

"Unity's Professional Services engineer not only had the skills and knowledge we needed, but he was also an expert communicator, making the entire process a huge success."

– Barry Besecker, Cofounder and CTO, Marxent

Why partner with Unity?

No one knows Unity like we do. Working with us gives you direct access to the engineers who built Unity and know the source code inside out – now and in the next version, so we can help you future-proof your work.

You'll be supported by leading industry veterans with insight into market trends, emerging and adjacent technologies, and best practices. We are partners who stay laser-focused on making sure you succeed throughout your journey with Unity.
